PROFESSIONAL SUMMARY

Recent Computer Science graduate with hands-on experience in backend and full-stack development using Python, Django, and REST APIs. Developed scalable web applications, including a healthcare consultation platform and e-commerce systems. Strong understanding of database design, authentication systems, and API development. Passionate about building efficient backend architectures and seeking a Junior Backend Developer or Software Developer opportunity.

TECHNICAL SKILLS

Languages: Python, JavaScript, C, C++, SQL

Backend: Django, Django REST Framework, REST APIs

Frontend: HTML, CSS, JavaScript, React (basic)

Databases: MySQL, PostgreSQL

Tools: Git, GitHub, VS Code, NetBeans, PyCharm, Code Blocks, Postman

Concepts: OOP, Data Structures & Algorithms, API Design, CRUD Operations, Authentication

PROJECTS

DocLink – Online Health Consultation Platform

Tech Stack: REST Framework, PostgreSQL, HTML, CSS, JavaScript, Prisma, React

- Developed a full-stack web application for virtual doctor consultations

- Designed and implemented RESTful APIs for appointment booking and user management
- Built features including doctor scheduling, patient records, and seminar notifications
- Managed application data using structured database models
- Focused on real-world healthcare workflow and scalable system design
- GitHub: <https://github.com/Bhanwar02>

Airline Ticket Booking System (Python, Tkinter)

- Built a GUI-based desktop application for flight search and ticket booking
- Implemented features such as flight schedules, seat availability, and pricing
- Developed user and admin modules with secure login and role-based access
- Managed booking data using structured data handling techniques
- GitHub: <https://github.com/Bhanwar02/Airline-Ticket-Booking-System>

E-commerce Backend System

- Developing a backend system using Django REST Framework
 - Implementing features such as product management, cart, and order processing
 - Building JWT-based authentication and role-based access control
 - Designing scalable APIs and database models using PostgreSQL
-

EXPERIENCE

Co-Founder & Social Media Manager

Breezified (E-commerce Digital Products Brand)

2025 – Present

- Co-founded and contributed to the growth of an e-commerce brand selling digital productivity templates
- Managed social media platforms, creating and scheduling content to increase brand awareness and engagement
- Analyzed engagement metrics to optimize content strategy and improve audience reach
- Collaborated with team members on product launches, promotions, and marketing strategies
- Contributed to business decision-making and overall brand development

Website: <https://breezified.com/>

Full Stack Developer Intern

GTB Computer Education, Jalandhar, India

May 2023 – September 2023

- Contributed to development of web applications using modern frontend and backend technologies (HTML, CSS, JavaScript, Python, and Django)
 - Assisted in building and testing application features and REST APIs
 - Debugged issues and improved application performance
 - Collaborated with team members using Git-based workflows
-

EDUCATION

Bachelor of Computer Science

Algoma University, Canada

Completed: April 2026

CERTIFICATIONS

- Full Stack Development Certificate – GTB Computer Education (2023)
 - Machine Learning A-Z: AI, Python & R – Udemy (2023)
 - Blockchain – Understanding Its Uses and Implications – edX (2021)
 - Python Basics for Data Science – edX (2021)
-

ADDITIONAL

- Strong problem-solving and analytical skills
- Quick learner with ability to adapt to new technologies
- Effective team collaboration and communication
